

# How to fix jerky screens in Tomtom Sat Nav 5 for Pocket PC

By Peter Topping

Switch on Tomtom and click on the upper part of the screen

Click "Browse map"

Click on "Change preferences"

Click "Options"

Disable "Show POI" so that it looks like the picture

Click "Done"

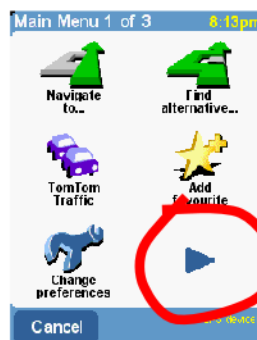

Tick the box "POINTS OF INTEREST"

Click "Done"

Click on the upper part of the screen again

Click the forward page arrow

Click "Done"
